

Kinesis Unified Messaging System

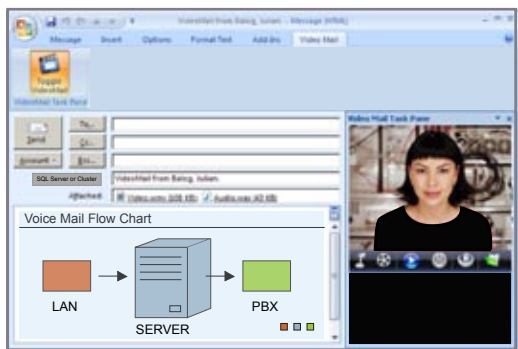

Unite your voice mail, video mail, email and faxes with your Microsoft Exchange Server. Messages are easily retrieved from anywhere at any time, using practically any convenient communications device. For large enterprises, Active Voice Kinesis Unified Messaging System is an ideal unified messaging solution.

Scale Up, Back Up, and Protect

Large enterprise organizations benefit from the fact that Kinesis is the ultimate unified messaging solution combining voice, video, fax and email messages into one unified system. Capabilities such as failover, replication, redundancy, security and geographically dispersed clustering provide the business continuity you demand.

Mobility and Unified Messaging

Your mobile workforce is more productive and responsive with the true unified messaging features of Kinesis. Accessing messages has never been easier regardless of device or location. Mobile users who rely upon messaging are more productive and have a higher level of satisfaction knowing messages are not lost.

Listen to your voice and email messages while you are on the road, and access your Outlook calendar using Text-to-Speech technology. Enable the voice recognition capabilities to work in a completely hands-free mode.

New VideoMail feature allows you to record and layback voice, video, and screen-capture messages for non-realtime conference capability.

Low Total Cost of Ownership

Easily upgrade and protect your investment in Octel systems and also minimize the cost to retrain your users with the Octel and Centigram emulations in Kinesis. With OctelNet integration capability, you can introduce new upgrade servers on the Octel network at your own pace — minimizing impact to budgets and operations.

Active Voice is a global leader in Unified Messaging. Our products empower people to communicate and manage information with convenience and efficiency using virtually any communication device to access and control their messages, data and real-time communications in a unified and easy-to-use way. With over 200,000 systems sold in more than 60 countries, Active Voice products fit into a wide-variety of business environments across a broad range of industry sectors.

Kinesis Unified Messaging System

New Features

Benefits

VideoMail

Easily capture video and audio to create visually rich messages. Users can create video with a web camera and record animated screen captures as part of the email message.

Integration with the Unified Messaging system allows retrieval from email system or via standard phone*.

Compressed file sizes allow ease of distribution, low impact to networks, and fast message delivery.

(*Phone retrieval accesses audio portion of message only)

ViewCall

ViewCall provides desktop call control and visibility of live incoming calls with a simple, non-intrusive control panel.

With the new UI design users can quickly select from multiple actions or greetings to optimize the caller's experience, and minimize screen intrusion for user.

FindMe FollowMe

Powerful new functions that allow multiple greetings per subscriber, Microsoft Exchange calendar based greetings and multiple call routing scenarios based on Exchange calendar status, schedule, applicable time periods. Action policies such as call transfer, play greeting, take message, auto-copy message and more.

ToolStudio

Includes tools that facilitate efficient system maintenance and troubleshooting such as System Info, Database check, VM Stream check, Exchange maintenance, Live Web Update, SMTP administrator notification and more!

Extension Remapping

Improve routing of calls by easily remapping calling and forwarding numbers to subscriber extension of choice.

True AutoCopy

Improve collaboration with the ability to automatically copy messages from one subscriber's mailbox to another.

ActiveFax with SoftFax

Allows users to receive and access faxes using a web browser. They can also use their phones to check how many faxes they have, get sender information, forward faxes with voice annotation or redirect faxes to a printer or a fax machine.

Optional Packages

Clustering

Text-to-Speech

Networking

Access to Outlook Calendar

Third-Party Fax Integration

Access to IMAP — Compliant email boxes
