

Repartee Unified Messaging System

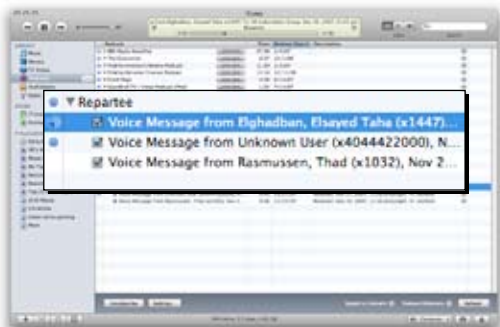

Active Voice's Repartee Unified Messaging System provides small and mid-size businesses flexible and easy-to-use message management from the desktop, telephone or Internet. Whether at the office, or on the road, users can increase their responsiveness by accessing voice, fax and e-mail messages from one convenient inbox and by handling real-time calls as they are received. Repartee lets users manage and respond to their messages by using simple voice commands, or a click of the mouse. That's the power of Active Voice's Repartee Unified Messaging System.

The Freedom of a Single Mailbox

Repartee offers advanced unified messaging, voice mail and automated attendant functionality, helping your organization become more responsive. Designed to work with the applications you use every day, Repartee integrates with LANs, giving you control over live telephone traffic and messages from your desktop. Through its optional suite of unified messaging and desktop call management applications, Repartee provides you with the most complete unified messaging solution available.

Redefining Unified Messaging

Advanced notification features alert employees to messages that matter most. The mobile workforce finds it as easy to communicate on the road as in office. As a result, there is an increase in productivity, acceleration in response time and improved customer service as employees stay connected with colleagues and clients.

Key new features included in Repartee are:

- Accessibility to voicemail via RSS Feeds
- ActiveSuite Client Applications
- Smartphone PDA support

Users can now access personal e-mails, voice mails and videos using the web portal of their choice, such as iGoogle and iTunes.

Repartee is a PC-based Unified Messaging software appliance that is built upon a proven software code and the Linux operating system, offering SMBs growth potential and sustainability.

Active Voice is a global leader in Unified Messaging. Our products empower people to communicate and manage information with convenience and efficiency using virtually any communication device to access and control their messages, data and real-time communications in a unified and easy-to-use way. With over 200,000 systems sold in more than 60 countries, Active Voice products fit into a wide variety of business environments across a broad range of industry sectors.
