

## VideoMail

Once again, Active Voice has raised the bar in Unified Messaging with the introduction of VideoMail. VideoMail extends the Unified Messaging capabilities of the Outlook client you are already using to include embedded video and animated screen capture files. With VideoMail, you can create and send visually rich messages that help you communicate with customers and coworkers in a whole new way.

### Easy to Send

The intuitive interface of VideoMail makes it as easy to record and send a personalized video or an animated screen capture file as it is to compose and send an ordinary email. That is because the VideoMail application adds a new ribbon menu item and task pane automatically in your email application.

By using any webcam, VideoMail automatically attaches the captured video to the email message. Live Screen Captures record everything happening on your desktop, and is recorded with a single click. This is a GREAT feature for anyone who frequently performs demonstrations or training, but can not always do it in person.

Once the recording is complete, you simply address the message, include any written comments, and click Send as you would any other email.

It's THAT easy!

*New VideoMail feature allows you to record and playback voice, video, and screen-capture messages for non-realtime conference capability.*

### Easy to Receive

Recipients do not need any special software to receive and view VideoMail messages. Most media players will play VideoMail messages. The video and screen capture files are fully compressed and no larger than a typical document attachment, so the file size is seldom an issue.

Active Voice is a global leader in Unified Messaging. Our products empower people to communicate and manage information with convenience and efficiency using virtually any communication device to access and control their messages, data and real-time communications in a unified and easy-to-use way. With over 200,000 systems sold in more than 60 countries, Active Voice products fit into a wide variety of business environments across a broad range of industry sectors.

# VideoMail

**VideoMail from Active Voice is available in the latest versions of Kinesis and Repartee Unified Messaging Systems. VideoMail can be added to many other non-Active Voice messaging systems. VideoMail can easily be downloaded to individual home PCs. And now users can even upload their VideoMails direct to their YouTube account.**

---

**VideoMail Lets You:**

Create and deliver video messages and screen captures through email.

Record and playback voice and video messages from Outlook.

Access separate audio files, created during video capture, to be accessed and played back via phone.

Communicate with clients and co-workers unlike ever before with one-stop access to audio and visual video messages from one common system.

---

**There are numerous applications for VideoMail technology, including IT troubleshooting, design reviews, sales and marketing.**

For individuals, VideoMail means a much richer—yet easier—messaging experience.

For organizations, VideoMail means a much quicker turnaround time on open issues being addressed through messaging.

The end result is increased productivity for both individuals and organizations.

---

**VideoMail from Active Voice. It truly represents the evolution of Unified Messaging.**
